PASSION PROJECTS

Stock Price Notifier August 2023

- Wrote a Python script that sends SMS text messages to users throughout the day, updating them on specific stock prices.
- Sends updated stock price according to the user's requested stocks.

Personal Finance Tracker September 2023

- Built a finance tracker that records user finances by connecting banking information using HTML, CSS, and JavaScript to communicate with a back-end database.
- Groups and graphs transactions/financial info for analysis.

Fraternity Website April 2024

- Built organization's website using HTML, CSS, and JavaScript. The website introduces new people and students to the fraternity, showing off the many attributes of the organization.
- Allows users to join a newsletter email list and send questions & comments to the organization using a contact form.
